EXPERIENCE

Total Experience: 3.5 Years

E2X Infotech Pvt Ltd

Software Developer

Noida, India

Apr 2024 – Present

Working as a Full Stack Developer on the Hotel Engine project using Angular, Node.js, Express.js, and MySQL.

Built RESTful APIs in Node.js and Express.js; integrated external APIs; tested using Postman.

Designed and implemented responsive frontend interfaces with Angular and Bootstrap. Built responsive, high-performance UI with Angular and Bootstrap, improving UX and reducing page load time.

Tricon IT Solutions Pvt Ltd

Software Engineer

Lucknow, India

Nov 2021 – Apr 2024

Worked as a Frontend Developer focusing on Angular-based enterprise Ed-Tech projects.

Resolved production bugs and delivered scalable features in collaboration with cross-functional teams.

Used Git for version control and Visual Studio for development.

PROJECTS

Blood Donor Search Platform (DonorBee): Developed a full-stack responsive web application to connect donors with recipients. Integrated donor location search and blood type filters.

Tech Stack: Angular, Bootstrap, Node.js, Express.js, MySQL

Github Link: DonorBee GitHub Repo

DASS-42 Mental Health Assessment Website (Team Project): Created a frontend interface for a questionnaire-based assessment tool, collaborating with backend developers for Spring Boot APIs.

Tech Stack: Angular, Bootstrap, Java, Spring Boot

Live Demo: zenly.dev/login
